

Match Your Tiling

...with a QUAD Skimmer Lid

Match Your Pool Edge

With a seamless flush finish, the skimmer lid virtually disappears.

Durable & Long Lasting

Made to last from marine grade 316 stainless steel. The tray helps prevent chips and cracks.

Safety First

Complies with the Australian Standard. Keeps children out of the skimmer box and away from danger.

Child proof with no weight requirements.

Solid 5-sided Stainless steel tray: minimises breakages.

Solid polished stainless steel key for easy removal of lid.

SKIMMER LIDS
PTY LTD
HIDDEN SAFETY

The QUAD Skimmer Lid is made with an infill from your selected paving and is supported with a 2mm thick 316 marine grade stainless steel tray to create a beautiful, seamless finish. The tray protects the tile from chipping and cracking, so breakage is minimised.

The dimensions of the QUAD tray is 336mm x 336mm square. We will cut and insert your natural stone, porcelain tile, ceramic tile or concrete paver into the lid. The thickness of your selected pool surround will predetermine which of the 4 tray depths is required. Trays are available in 15mm, 25mm, 35mm or 45mm.

The Recess Frame is a great optional extra. The Recess Frame protects the surrounding tiles from accidentally chipping during use. The frame can also be used in the initial stages of tiling for easy and quick set out in preparation for the QUAD lid. Available for use with the QUAD10, QUAD20 or QUAD30 Skimmer Lids.

The QUAD key is required for lid removal as per Australian Standard AS 1926.3-2010 Swimming Pool Safety - Water Recirculation Systems required for skimmer box lid certification. The keyway that is cut into the paving material provides the required ventilation as required by the Standard.
